Data are based on base model with standard wheel. An upgrade of options and packages can lead to increased emissions and fuel consumption.

* Den angivna bränsleförbrukningen och utsläppsvärdena utgår från EU-förordning (EG) 715/2007 i den version som gällde vid tidpunkten för typgodkännande. Värdena avser ett tygfordon med grundläggande konfiguration och det visade intervallet tar hänsyn till storleken på hjul, däck och extrautrustning.

* Värdena är enligt WLTP-körcykeln. Från och med 1 januari 2020 har WLTP helt ersatt den tidigare körcykeln NEDC. På grund av mer realistiska testförhållande - i WLTP är uppmätt bränsleförbrukning, energiförbrukning och koldioxidvärde ofta högre och verklig räckvidd i många fall lägre än med uppmätt NEDC-värde. Andra värden kan gälla vid beräkning av skatt och övriga fordonavgifter. Du kan beräkna din fordonsskatt på: www.bilsvar.se

Mer information om WLTP-körcykeln finns på www.bmw.se/wltp.
